

MBBS Admission Reality Check & Roadmap

Prepared for Prerna Bishnoi | NEET UG 2026

Category	Home State	Approx. AIR
General / EWS	Rajasthan (Jodhpur)	8,41,000
Target Degree	Budget (total course)	Preferred States
MBBS	₹50 lakh – ₹1 crore	Uttarakhand, UP, HP, Chhattisgarh

1. The Honest Picture — Please Read This First

I have cross-checked actual 2024–25 closing-rank data (not just fee brackets) for government, state-quota, management-quota and NRI-quota MBBS seats across Uttarakhand, Uttar Pradesh, Himachal Pradesh and Chhattisgarh. Here is the straightforward summary:

In verified recent-year data, across all 4 states and all quota types (govt + private + management + NRI), MBBS seats closed somewhere between AIR ~2,000 (top govt colleges) and AIR ~4,00,000–4,50,000 (the most fee-lenient private management-quota seat found, MMU Solan, Himachal Pradesh).

Your AIR of 8,41,000 is beyond every confirmed closing rank found for regular-round MBBS admission in these 4 states — roughly double the most lenient one on record. This is a national pattern, not specific to your states: independent sources confirm that regular-round MBBS seats anywhere in India (govt, private or deemed) generally stop around AIR 6–8 lakh at the very outer edge.

This means: based on real historical data, a regular-round MBBS seat in Uttarakhand / UP / HP / Chhattisgarh this year is very unlikely. I'd rather tell you this clearly now than have you or your family commit money chasing a seat that the data says is out of reach — your budget of ₹50L–1Cr is real money, and it deserves to be pointed at options that actually have a realistic chance.

That said — this is not a flat zero. Section 2 explains the one genuine wildcard, Section 3 gives you the full state-wise data so you can judge for yourself, and Section 4 gives you reliable options that DO match your rank today, in your own preferred states.

2. The One Real Wildcard: Stray Vacancy Rounds

After Round 1, Round 2 and the Mop-Up round, colleges with unfilled seats take part in a final Stray Vacancy Round. Because this depends on how many admitted students don't join or drop out — not on merit — cutoffs can loosen dramatically in colleges nobody expected. This is real and documented:

- **In the NEET UG 2025 stray vacancy round, Government Medical College, Bettiah (Bihar) closed its LAST seat at AIR 12,82,063 — a government college, at a rank higher than yours.**
- This happens mainly in newer or less-known government colleges in states where seats outnumber last-minute demand.

Candidates most likely to benefit from this pattern in your 4 states — worth registering for even though nothing is guaranteed:

State	Colleges most likely to reach late/stray rounds	Why
Uttar Pradesh	Newest Autonomous State Medical Colleges: Auraiya, Gonda, Lakhimpur Kheri, Chandauli, Kaushambi, Sonbhadra, Sultanpur, Pilibhit, Bijnor, Kushinagar, Lalitpur, Bulandshahr	Newly opened (2022–25), low brand recognition, seats frequently go unfilled till stray round
Chhattisgarh	GMC Mahasamund, GMC Korba	Newest colleges (est. 2022), smallest applicant pull
Uttarakhand	GMC Haridwar	Newest govt college in the state
Himachal Pradesh	MMU Solan (Management/NRI seats)	Only private college in HP; NRI seats often convert to Management in stray round, cutoff drops sharply

Action: register for MCC (15% AIQ) AND all four state counselling authorities, and stay in every round including stray vacancy — it costs only your time, and the Bihar example shows it can work.

3. State-by-State Closing Rank Data (Verified, Recent Years)

Ranks below are General category, most recent confirmed data. Treat them as reference points, not guarantees — they move every year.

Uttar Pradesh

College	Type	Recent Closing Rank (AIR)	Total Course Fee
KGMU Lucknow / GSVM Kanpur	Govt, State Quota	~2,000 – 20,000	₹3 – 5 lakh
Muzaffarnagar Medical College	Private (Minority-tagged, open to all), AIQ paid seat	70,851 – 2,96,410 (2025)	~₹75 lakh
Other UP private colleges, Management/NRI quota	Private, estimated trend (not officially confirmed)	up to ~6 – 8 lakh in late rounds (estimate)	₹50 – 75 lakh

Chhattisgarh

College	Type	Recent Closing Rank / Marks	Total Course Fee
Pt. JNM Medical College, Raipur	Govt, State Quota (UR)	~530+ marks (low AIR)	~₹2 lakh
CIMS Bilaspur / GMC Rajnandgaon, Jagdalpur, Raigarh, Kanker	Govt, State Quota	Competitive; 590–670 marks reported for open seats	~₹2 – 3 lakh
Shri Shankaracharya / RIMS Raipur / Shri Balaji Institute	Private	500–530 marks needed per available data	₹40 – 48 lakh

Himachal Pradesh

College	Type	Recent Closing Rank / Marks	Total Course Fee
IGMC Shimla / RPGMC Tanda	Govt, AIQ + State Quota	AIQ ~2,600; State quota ~1,00,000–1,12,000	₹2.6 lakh
MMU Solan	Private, Management Quota	~350–400 marks ≈ AIR 3–4.5 lakh (closest match found, still short of your AIR)	₹72 – 85 lakh

Uttarakhand

College	Type	Recent Closing Rank	Total Course Fee
AIIMS Rishikesh / Doon Medical College	Govt, AIQ + State Quota	Highly competitive, under AIR 30,000	₹5,000 – 1.5 lakh
VCSG Srinagar / SSJ Almora / GMC Haldwani	Govt, State Quota	Historically ~20,000–30,000 (older data; verify current)	₹45,000 – 55,000/yr

College	Type	Recent Closing Rank	Total Course Fee
HIMS Dehradun / SGRR Medical College	Private, Management Quota	Not clearly published — contact college admission office directly	₹99 lakh – 1.1 crore

Note on Uttarakhand: it is also the state most likely to exceed your ₹1 crore upper budget at the private colleges, based on available fee data.

4. Reliable Options That Match Your Rank Today

These courses genuinely accept candidates in the AIR 6–9 lakh range, confirmed by real closing-rank data, and — importantly — real examples exist inside your own 4 preferred states:

Course	Example College (in your states)	State	Recent Closing Rank	Approx. Fee
BAMS (Ayurveda)	Bharat Ayurved College, Muzaffarnagar	UP	~7,90,000	Moderate
BAMS (Ayurveda)	R.K. Ayurvedic College, Azamgarh	UP	~7,80,000	Moderate
BHMS (Homeopathy)	Himachal Homoeopathic College, Solan	HP	~7,90,000	Moderate
BDS (Dental)	Rungta Dental College, Bhilai	Chhattisgarh	~7,00,000	₹8–10 lakh total
BDS (Dental)	Kalka Dental College, Meerut	UP	~7,60,000	₹8–10 lakh total
B.Sc. Nursing	Subharti Medical College, Meerut	UP	~7,50,000	Low

MBBS Abroad is the other realistic full-MBBS route: NEET qualification is the only requirement (no rank cutoff), popular NMC-recognised options are in Russia, Georgia, Kazakhstan and Uzbekistan, and total cost typically runs ₹20–40 lakh — comfortably inside your budget. You will need to clear the NExT exam on return to practice in India, so verify a university's NMC screening status before paying anything.

5. Recommended Action Plan

1. Register for MCC 15% All India Quota counselling — it's free to try and covers all 4 states' government college AIQ seats.
2. Register separately with each state counselling authority: UPNEET (upneet.gov.in) for UP, HNBUMU for Uttarakhand, AMRU (amruhp.ac.in) for Himachal Pradesh, and DME Chhattisgarh — none of these require domicile for private-college management/NRI seats.
3. Fill choices for every available college, including the newest/smallest ones listed in Section 2 — do not skip any.
4. Stay registered through Mop-Up and Stray Vacancy rounds. This is where the data shows outlier admissions happen.
5. In parallel, shortlist 2–3 BAMS/BHMS/BDS/Nursing colleges from Section 4 as a secured backup so you aren't left with nothing if MBBS doesn't come through this year.
6. If a full medical degree this year matters more than the MBBS label, start comparing NMC-recognised MBBS-abroad universities now.
7. If your goal is specifically an Indian MBBS and you're open to it: your budget would also fund strong repeat-year coaching. A realistic improvement of 150–200 marks would put government MBBS in all 4 of your preferred states comfortably within reach.

A Closing Note

I know this isn't the document you originally asked for, and I'm sorry the news isn't what you were hoping to hear. But you deserve accurate numbers

rather than a hopeful-looking list that doesn't hold up — that would cost you time and your family real money. The good news: your budget keeps every door open — a strong AYUSH/dental degree, an MBBS abroad, or a genuinely competitive repeat attempt. None of these close off a career in medicine; they just point you to the route the data actually supports.

Disclaimer: Cutoff ranks and fees change every year based on exam difficulty, seat matrix and applicant numbers. Figures above are compiled from publicly available counselling-consultancy and college-aggregator sources for recent years and are reference points, not guarantees. Always verify current-year cutoffs and fee notifications on mcc.nic.in and the respective official state counselling portals before making any financial commitment.
